AIR CONDITIONING

MITSUBISHI HEAVY INDUSTRIES AIR-CONDITIONERS AUSTRALIA

The NSW Government is offering households and small businesses a discount to install energy efficient air conditioners.

What's the offer?

Incentive	Capacity	Minimum star rating
\$200	≤4 kW	5.5 ★ heating + 5 ★ cooling (or vice versa)
\$500	4 kW to ≤10 kW	4 ★ (AEER and COP ≥4.25 ★)
\$1000	>10 kW	3.5 ★ (AEER and COP ≥4 ★)

Only demand response capable split systems are eligible.

How do households and small businesses get this offer?

They can only claim it through an installer approved by Air Conditioning Incentives (ACI). ACI partners with the NSW Government to deliver this offer.

Why should I become an approved installer?

- **Increase sales** by giving your customers a discount from the NSW Government
- **Have a competitive advantage** over installers not offering this deal
- Get your company listed on a **government website**
- Have the chance to win regular **\$200 retail vouchers** for reporting refrigerant.

How do I get approved?

Approval process is really simple. Contact ACI. They will explain how the offer works.

This sounds great. What else?

You'll need to:

- Promote the offer
- Collect customer details and evidence of the installation with an app
- Recover refrigerant and dispose of old AC units.

If you're interested, contact ACI:
